*If sessions become over/under-subscribed, The Institute of Professional Learning reserves the right to reallocate session dates for some teachers. This will ensure all provisionally certificated teachers receive quality professional learning.*

**Session One (P1): Getting to Grips with Teacher Registration/ Using Your ePortfolio to Work Smarter**

Explore the requirements towards your practising certificate:

- practising teacher criteria – what does this mean for me?
- an opportunity to raise any concerns or queries you may have relating to teacher registration.

In this practical, hands-on session participants will explore:

- the benefits of having an e-portfolio for teacher registration evidence
- the range of ePortfolio formats available
- how to gather evidence in "time-smart" ways to add to ePortfolios.

**Session One (P2): I Have All Of This Data – What Do I Do With It?**

The afternoon’s session will focus on the effective use of data to inform teaching and learning:

- formative assessment practices
- feedback
- moderation.

**Session Two: Classroom Strategies and Management**

Building from the big picture of managing a classroom to actual individual one on one practical ideas.

- Creating and keeping one group
- What sort of teacher am I?
- Adapted and Mal-adapted behaviour
- How we select the behaviour we use
- Why we behave the way we do
- Creating boundaries
- Checking individual behaviour

**Session Three: Professional Practice: Teaching as Inquiry**

Exploring teaching as inquiry in the secondary context.

- What is teaching as inquiry?
- How can I use this practice to enhance the teaching and learning programmes in my class?
- How can I use this practice to provide evidence for registration?

**Session Four: The Wisdom of the Collective!**

This workshop will be an opportunity for:

- participants to reflect on and share teaching practices that they feel have been successful to effectively engage the learner and improve the learning
- facilitators to share a range of evidenced based practices that have been used to empower teachers to effectively engage the learner and improve learning
- an examination of the different mind-sets that allow the conditions for these practices to be used effectively.

If sessions become over/under-subscribed, The Institute of Professional Learning reserves the right to reallocate session dates for some teachers. This will ensure all provisionally certificated teachers receive quality professional learning.

Session One: **Show Me, Teach Me, Guide Me! Student-Centred Learning**

This workshop will explore the concept of a student-centred approach to teaching and learning. Practical strategies will be shared and discussed as participants review their current learning programmes and investigate ways to design learning experiences that put students at the centre.

Explore the requirements towards your practicing certificate: Are your students driving their own learning or are they being driven?

Session Two: **Motivating De Motivated Students**

A full day workshop that considers the idea of motivation along with future focused students and goals. It investigates 'the marshmallow experiment', and how this is relevant in today's teaching climate.

- Come prepared to be challenged in your thinking of what motivation is and what the ingredients look like.
- Learn how to manipulate goals and motivational ideas to get the best outcome for yourself and your students.
- Not recommended for the un-motivated!

Session Three: **Digital Tools across the Curriculum**

How can we integrate digital tools so that the focus is on the learning and not the tool?

In this workshop we will explore a range of tools that can be used across different curriculum areas.

Participants will have the opportunity to learn how to use tools and will develop a resource bank of strategies for their implementation back in school.

Session Four: **The Wisdom of the Collective!**

This workshop will be an opportunity for:

- participants to reflect on and share teaching practices that they feel have been successful to effectively engage the learner and improve the learning
- facilitators to share a range of evidenced based practices that have been used to empower teachers to effectively engage the learner and improve learning
- an examination of the different mind-sets that allow the conditions for these practices to be used effectively.

The day will be interactive with time provided for dialogue and the sharing of thinking and ideas.

Support will be given to link current teacher practice with theory and research in order to identify possible next steps.

Please Note: The organisers will endeavour to ensure that the session programmes will be delivered as advertised but unforeseen circumstances may necessitate change.
