Your Phone

This chapter describes the features of the Cisco Unified IP Phone 6921, 6941, 6945, and 6961.

Cisco Unified IP Phone 6921

The Cisco Unified IP Phone 6921 provides these features:

- Phone connections
- Buttons and hardware
- Phone screen

Phone Connections

For your phone to work, it must be connected to the corporate IP telephony network. Your system administrator can help you connect your phone.

Handset Rest

Your system administrator may have mounted your phone on a wall. With a wall-mounted phone, you might need to adjust the handset rest to ensure that the receiver will not slip out of the cradle.
Power-Saving Mode

Your phone supports the Cisco EnergyWise (EW) program. Your system administrator sets up sleep (power down) and wake (power up) times for your phone to save energy.

Ten minutes before the scheduled sleep time, the Select button flashes and you receive a message that your phone will power down at a specific time. If the power-saving mode is enabled by your system administrator, you hear your ringtone play. The ringtone plays according to the following schedule:

- At 10 minutes before power down, the ringtone plays four times

---

1. Remove the handset from the cradle and pull the plastic tab from the handset rest.
2. Rotate the tab 180 degrees.
3. Hold the tab between two fingers, with the corner notches facing you. Make sure the tab lines up evenly with the slot in the handset cradle.
4. Press the tab evenly into the slot. An extension protrudes from the top of the rotated tab. Return the handset to the handset rest.

---
• At 7 minutes before power down, the ringtone plays four times
• At 4 minutes before power down, the ringtone plays four times
• At 30 seconds before power down, the ringtone plays 15 times or until the phone powers down

If your phone is inactive (idle) at the sleep time, your phone powers down. If your phone is active (for example, on a call), your phone waits until it has been inactive for a period of time before removing power.

After the phone goes to sleep, press the Select button to wake your phone up. After the phone is inactive for a period of time, the phone goes back to sleep. At the set wake time, your phone powers up.

Wake and sleep times are also linked to the configured days that you normally work. If your requirements change (for example, your work hours or work days change), see your system administrator to have your phone reconfigured.

For more information about EnergyWise and your phone, see your system administrator.
Applications

Phone Applications

Phone applications allow you to access the following:

- Services
- Call History
- Preferences
- Phone Information
- Administrator Settings (For system administrators only.)

Services

Phone services can include special phone features, network data, and web-based information (such as stock quotes and movie listings). The services available for your phone depend on the phone system configuration and the services you are subscribed to. For more information, see your system administrator.

Access Services

1. Press the Applications button.
2. Select the service you want to access. (Use the Navigation bar and button to scroll and select.)
3. Press the Select softkey, or press the Exit softkey to return to the Applications screen.

Call History

Call History allows you to view information about the last 150 calls on your phone. A call icon is displayed to indicate the type of call:

- Received
- Placed
- Missed
The caller ID is displayed with the call icon. If the caller ID is unavailable, then the phone number is displayed. If the phone number is unavailable, then “Unknown” is displayed. All Call History items are integrated into one list and are ordered by time (latest to oldest). Calls for the same caller ID and phone number are grouped together only when they occur in chronological order and do not have calls associated. For each group, the time of the latest call and the number of calls, are displayed:

- Incoming (Received) and outgoing (Placed) calls are grouped together.
- Missed calls are grouped together in a separate group.

There is 150 call limit per phone and not per line. For example, if a phone has multiple lines, the 150 call limit is for all lines combined.

You can sort the Call History list by all lines, each line, or by missed calls. You can also dial a number directly from the Call History list.

**View Call History**

1. Press the Applications button.
2. Select Call History. (Use the Navigation bar and button to scroll and select.)
3. Select All Lines or the line that you want to view.
4. Press the softkey to return to the Call History screen.

**View Call Record Details**

1. Press the Applications button.
2. Select Call History. (Use the Navigation bar and button to scroll and select.)
3. Select All Lines or the line that you want to view.
4. Select a call record and press the Details softkey (you may need to press the more softkey first).
5. Press the softkey to return to the Call History list.

**Filter Call History**

1. Press the Applications button.
2. Select Call History. (Use the Navigation bar and button to scroll and select.)
3. Select All Lines or the line that you want to view.
4. To sort by missed calls for the selected line, press the Missed Calls softkey.
5. To view all calls in the Call History list, press the All Calls softkey.
6. Press the softkey to return to the Call History screen.

**Dial From Call History**

1. Press the Applications button.
2. Select **Call History**. (Use the Navigation bar and button to scroll and select.)
3. Select **All Lines** or the line that you want to view.
4. From the **Call History** list, select the call you want to dial and do one of the following:
   - Press the **Call** softkey.
   - Press the line key.
   - Pick up the handset.
   - Press the speakerphone or headset button.

**Edit Number From Call History**

1. Press the **Applications** button 📲.
2. Select **Call History**. (Use the Navigation bar and button to scroll and select.)
3. Select **All Lines** or the line that you want to view.
4. Select the call you want to edit.
5. Press the **EditDial** softkey (you may need to press the **more** softkey first).
6. Press the >> softkey to move the cursor to the right and press the << softkey to move the cursor to the left.
7. Press the ✖ softkey to delete numbers.
8. Press the **Dial** softkey to dial the edited number (you may need to press the **more** softkey first).
9. Press the ↘ softkey to return to the **Call History** list.

**Clear Call History**

1. Press the **Applications** button 📲.
2. Select **Call History**. (Use the Navigation bar and button to scroll and select.)
3. Select **All Lines** or the line that you want to view.
4. Press the **Clear** softkey (you may need to press the **more** softkey first).
5. Press the **Delete** softkey to delete the **Call History** list, or press the **Cancel** softkey to go back to the **Call History** screen.

**Delete Call Record From Call History**

1. Press the **Applications** button 📲.
2. Select **Call History**. (Use the Navigation bar and button to scroll and select.)
3. Select **All Lines** or the line that you want to view.
4. Select the call you want to delete.
5. Press the **Del Call** softkey (you may need to press the **more** softkey first).
6. Press the **Delete** softkey to delete the call, or press the **Cancel** softkey to go back to the Call History screen.

**Preferences**

Preferences allows you to set these user preferences:

- Ring Tone
- Contrast

**Ring Tones**

You can customize how your phone indicates an incoming call and a new voice mail message. You can also adjust the ringer volume for your phone.

**Change Ringtone for a Line**

1. Press the **Applications** button .
2. Select **Preferences**. (Use the Navigation bar and button to scroll and select.)
3. Select **Ringtone**.
4. Select a ringtone.
5. Press the **Play** softkey to play a sample.
6. Press the **Set** softkey to select the ringtone.
7. Press the **Apply** softkey to confirm your selection, or press the **Cancel** softkey to go back to the Ringtone screen.
8. Press the  softkey to return to the Preferences screen.

**Contrast**

You can adjust your phone screen contrast level. The default contrast level setting is 50%.

**Adjust the Contrast**

1. Press the **Applications** button .
2. Select **Preferences**. (Use the Navigation bar and button to scroll and select.)
3. Select **Contrast**.
4. To increase contrast, press the up arrow on the Navigation bar. To decrease contrast, press the down arrow.
5. Press the **Save** softkey to set the contrast level, or press the **Cancel** softkey to exit.
Phone Information

Phone Information allows you to view the following model information for your phone:

- Model Number
- IP Address
- MAC Address
- Unified Video Advantage
- Active Load
- Inactive Load
- Last Upgrade
- Active Server
- Stand-by-Server
- Backlight On Time
- Backlight On Duration
- Backlight Idle Timeout
- Days Backlight Not Active

View Phone Information

1. Press the Applications button.
2. Select Phone Information. (Use the Navigation bar and button to scroll and select.)
3. Press the Exit softkey to return to the Applications screen.

Administrator Settings

For information on accessing and changing the Administrator Settings, see your system administrator.
Contacts

Phone Contacts

The Cisco Unified IP Phones 6921, 6941, 6945, and 6961 provide you with access to corporate and personal contacts using these directories:
- Corporate Directory
- Personal Directory

Corporate Directory

The corporate directory contains corporate contacts that you can access on your phone. Your system administrator sets up and maintains the directory.
You can dial calls from your corporate directory in two ways:
- When you are not on another call.
- When you are on another call.

Related Topics
Line Status, page 53

Search for and Dial a Contact

1. Press the Contacts button.
2. Select Corporate Directory. (Use the Navigation bar and button to scroll and select.)
3. Select any of these criteria to search for a co-worker:
   - First name
   - Last name
   - Number
4. Enter the search criteria information, press the Submit softkey, and select a contact.
5. To dial a contact, use one of these options:
   - Press the Dial softkey.
   - Press the Select button.
– Press the contact label number.
– Press a line button.
– Press the Speakerphone button 🎤.
– Press the Headset button 🎧.
– Pick up the handset.

**Search for and Dial a Contact While on a Call**

1. Press the Contacts button 📚.
2. Select Corporate Directory. (Use the Navigation bar and button to scroll and select.)
3. Select any of these criteria to search for a co-worker:
   – First name
   – Last name
   – Number
4. Enter the information, then select Search > Dial.
5. Select one of these to handle the original call:
   – Hold button 🖤—Puts the first call on hold and dials the second.
   – Transfer button ✆ —Transfers the first party to the second and drops you from the call. To complete the action, press the Transfer button again after dialing.
   – Conference button 🎤—Creates a conference call with all parties, including you. To complete the action, press the Conference button again after dialing.
   – End Call softkey—Disconnects the first call and dials the second.

**Personal Directory**

The personal directory contains a list of your personal contacts. You can assign fast-dial codes to your personal directory entries for fast-dialing.

There are two ways you can set up and maintain your personal directory:

- Phone—Using your phone, you can:
  – Set up and use Personal Directory
  – Assign and use fast-dial codes
- User Options Web Pages—Using User Options web pages, you can also set up and use your personal directory.

**Related Topics**

User Options, page 67
Personal Directory Options

From your phone, you can use personal directory options to:

- Sign in and out
- Add an entry
- Search for an entry
- Dial a number
- Delete an entry
- Edit an entry

Sign In and Out of Personal Directory

1. Press the Contacts button.
2. Select Personal Directory. (Use the Navigation bar and button to scroll and select.)
3. Enter your user ID and PIN (provided by your system administrator), then press the Submit softkey.
4. Select the Exit softkey, twice, to sign out.
   
   If you do not sign out, you are automatically signed out. For more information, see your system administrator.

Add a Personal Directory Entry

1. Sign in to Personal Directory.
2. Press the New softkey (you may need to press the more softkey first).
3. Enter the name information.
4. Press the Phones softkey and enter the phone numbers.
   
   Include any required access codes such as a 9 or 1.
5. Press the Submit softkey to add the entry to your personal directory.

Search for an Entry in Personal Directory

1. Sign in to Personal Directory.
2. Select Personal Address Book. (Use the Navigation bar and button to scroll and select.)
3. Choose any of the following criteria to search for an entry. (Use the Navigation bar and button to scroll and select.)
   - First name
   - Last name
4. Enter the search criteria information, then press the Submit softkey. The name displays.
5. Press the Select softkey.

**Dial a Number from Personal Directory**

1. Sign in to Personal Directory and search for an entry. (Use the Navigation bar and button to scroll and select.)
2. Select the number that you want to dial.
3. To dial a contact, use one of these options:
   - Press the Dial softkey.
   - Press a line button.
   - Press the Speakerphone button 🎤.
   - Press the Headset button 📞.
   - Pick up the handset.

**Delete a Personal Directory Entry**

1. Sign in to Personal Directory and search for an entry. (Use the Navigation bar and button to scroll and select.)
2. Press the Edit softkey.
3. Press the Delete softkey. (You may need to select the more softkey first.)
4. Press the OK softkey to confirm the deletion.

**Edit a Personal Directory Entry**

1. Sign in to Personal Directory and search for an entry. (Use the Navigation bar and button to scroll and select.)
2. Press the Edit softkey to modify the name or email address.
3. Modify the name or email address.
4. Press the Phones softkey to modify a phone number.
5. Press the Update softkey.
Fast-Dial Codes with Personal Directory

Using the phone, you can:
- Assign a fast-dial code to a Personal Directory entry
- Place a call using a fast-dial code
- Delete a fast-dial code

Assign a Fast-Dial Code to a Personal Directory Entry

1. Sign in to Personal Directory. (Use the navigation bar and button to scroll and select.)
2. Enter the name information and press the Submit softkey.
3. Select the name, then press the FastDial softkey.
4. Select a number and press the Select softkey.
5. Press the Next softkey.
6. Press the Assign softkey for a new fast-dial code that you want to assign to the number.

Place a Call Using a Fast-Dial Code

1. Sign in to Personal Directory and search for a fast-dial code. (Use the Navigation bar and button to scroll and select.)
2. Select the fast-dial code you want to dial.
3. Press the Dial softkey.

Delete a Fast-Dial Code

1. Sign in to Personal Directory and search for a fast-dial code. (Use the Navigation bar and button to scroll and select.)
2. Select the fast-dial code that you want to delete.
3. Press the Remove softkey.
Messages

Voice Messages

Voice messages are stored on your voicemail system. Your company determines the voicemail system your phone uses.

You can:

• Personalize your voicemail
• Check for voice messages
• Listen to voice messages

Personalize Your Voicemail

Press the Messages button , then follow the voice prompts.

Check for Voice Messages

Check for voice messages in any of these ways:

• Look at the visual message indicator lamp on your handset.
  You can configure the visual message indicator lamp using your User Options web pages.
• Look for:
  – (For Cisco Unified IP Phone 6941 and 6945 only.) A message waiting icon.
  – (For Cisco Unified IP Phones 6921 and 6961 only.) A text message.
• Listen for a stutter tone from your handset, headset, or speakerphone when you place a call.
  The stutter tone is line-specific. You hear it only when using the line that has a waiting message.
  You can configure the audible message indicator using your User Options web pages.

Agent Greeting

The Agent Greeting feature allows an agent to create and update a prerecorded greeting that plays at the beginning of a call, such as a customer call, before the agent begins the conversation with the caller. The agent can prerecord a single greeting or multiple ones as needed.

When a customer calls, both the customer and the agent hear the prerecorded greeting. The agent can remain on mute until the greeting ends or answer the call over the greeting.

For more information, see your system administrator.

Answer

Answer allows you to answer the oldest call that is available on all line appearances on your phone, including Hold Reversion and Park Reversion calls that are in an alerting state. Incoming calls are always given priority over Held or Park Reversion calls. Your system administrator sets up the Answer button depending on your call-handling needs and work environment. This feature is typically set up for users who have multiple lines.

When you get a call, you see a notification window on the phone screen, called a call toast. The call toast remains visible for a preset amount of time.

If an incoming call has been call forwarded from another phone, you may see additional information to identify that the call has been forwarded. Your system administrator controls the amount of additional information displayed. Additional information can identify the person who forwarded the call to you and the caller information.

Auto Answer

Auto Answer prompts your phone to automatically answer incoming calls after one ring.

Your system administrator sets up Auto Answer to work with either your speakerphone or headset.
Auto Answer with Your Headset

Keep the headset button \[Ω\] illuminated when the phone is idle. Otherwise, calls ring normally and you must manually answer them.

To keep the headset button illuminated, use a line button or softkeys (instead of the headset button) to go off hook and on hook, and to place and end calls.

Auto Answer with Your Speakerphone

Keep the handset in the cradle and the headset button \[Ω\] unlit. Otherwise, calls ring normally and you must manually answer them.

Call Back

Call Back allows you to receive an audio and visual notification on your phone when a busy or unavailable party becomes available.

Set up a Call Back Notification

1. Press the Callback softkey while listening to the busy tone or ring sound.
   A confirmation screen displays on the phone.
2. Press the Exit softkey to return to the main screen, if desired.
   Your phone alerts you when the line is free.
3. Press the Dial softkey to place the call again, if desired.

Call Forward All

Call Forward All allows you to forward calls on your phone to another number.

For your primary line, you can set up Call Forward All directly on your phone. For all other lines—or to access Call Forward All remotely—go to your User Options web pages.

There are two types of call forwarding features that your system administrator might set up on your phone:

- Unconditional call forwarding (Call Forward All)—Applies to all calls that you receive.
- Conditional call forwarding (Call Forward No Answer, Call Forward Busy, Call Forward No Coverage)—Applies to certain calls that you receive, according to conditions, and is accessible only from your User Options web pages.

When forwarding calls from your phone:
Calling Features

- Enter the call forward target number exactly as you would dial it from your phone. For example, enter an access code or the area code, if necessary.
- Call forwarding is phone-line specific. If a call reaches you on a line where call forwarding is not enabled, the call will ring as usual.
- Your system administrator can set up other call forward options that:
  - Allow calls placed from the call forward target number to your phone to ring through, rather than be forwarded.
  - Prevent you from creating a call forward loop or exceeding the maximum number of links in a call forwarding chain.

Related Topics
Set Up Call Forwarding Per Line, page 69

Forward Calls on a Primary Line

1. Press the Fwd All softkey.
2. Enter the target phone number. (Depending on how your voicemail system is set up, you may be able to press the Messages button to forward all calls to voicemail.) Visual confirmation displays on your screen for as long as the feature is enabled.
3. To cancel call forwarding, press Fwd OFF. To forward calls on other lines, go to your User Options Web pages.

Call Park

Call Park allows you to park (temporarily store) a call you receive on your phone, and which you can then retrieve from another phone (for example, a phone at a co-worker’s desk or in a conference room).

There are three ways you can park a call:
- Park—Allows you to park an active call that you answered on your phone, and retrieve it using another phone in the Cisco Unified Communications Manager system.
- Manual Directed Call Park—Allows you to park an active call by transferring it to a Directed Call number, which your system administrator sets up. You retrieve the call at another phone by dialing a park retrieval prefix number (provided by your system administrator), then dialing the Directed Call number you used to park the call.
- Assisted Directed Call Park—Allows you to park an active call using a feature button, which your system administrator sets up as a speed dial line. You retrieve the call from any other Cisco Unified IP Phone in your network.
Your system administrator sets up either the Manual Directed Call Park or the Park feature on your phone, but not both.

**Related Topics**

Line Status, page 53

---

**Park and Retrieve a Call Using Park**

1. During a call, press the **Park** softkey.
   
   Your phone displays the call park number where the system stored your call.
2. Note the call park number displayed on your phone screen.
   
   You will use the number to retrieve the call.
3. Hang up.
   
   You have a limited time to retrieve a parked call before it reverts to ringing at the original number.
4. From any other Cisco Unified IP Phone in your network, enter the call park number to retrieve the call.

**Park and Retrieve a Call Using Manual Directed Call Park**

1. During a call, press the **Transfer** button.

2. Enter the Directed Call number where you will park the call.

3. Press **Transfer** again to finish parking the call, then hang up.

   You have a limited time to retrieve a parked call before it reverts to ringing at the original number.
4. Retrieve the call, from any other Cisco Unified IP Phone in your network as follows:
   
   a. Enter the park retrieval prefix.
   
   b. Dial the Directed Call number.

   For example, if the park retrieval prefix is “99” and the Directed Call number is “1234”, enter 991234.

**Park and Retrieve a Call Using Assisted Directed Call Park**

1. During a call, press the **Assisted Directed Call Park** button displaying an idle Line Status indicator.

2. To retrieve a parked call from an assisted directed call park number, press the flashing **Assisted Direct Call Park** button.

If your administrator has not configured a reversion directory number, the parked call is reversed to the phone parking the call.
Call Pickup

Call Pickup allows you to answer a call that is ringing on a co-worker’s phone by redirecting the call to your phone.

You might use Call Pickup if you share call-handling tasks with co-workers.

There are three ways you can pick up a call:

- **Pickup**—Allows you to answer a call that is ringing on another phone within your call pickup group.
  
  If multiple calls are available for pick up, your phone picks up the oldest call first (the call that has been ringing for the longest time).

- **Group Pickup**—Allows you to answer a call on a phone that is outside your call pickup group by:
  
  - Using a group pickup number (provided by your system administrator).
  
  - Dialing the ringing phone’s number.

- **Other Pickup**—Allows you to answer a call that is ringing on another phone within in your call pickup group or in an associated call pickup group.

Your system administrator sets up the call pickup group you are in, and the call pickup softkeys depending on your call-handling needs and work environment.

You can also monitor and pick up ringing calls using Line Status indicators if your system administrator has set up Line Status indicators on speed dial buttons for you. Line Status indicators allow you to see if a line associated with a speed dial button is idle, in-use, in a Do Not Disturb state, or ringing.

**Related Topics**

Line Status, page 53

**Answer a Call Using Pickup**

1. Press the **PickUp** softkey to transfer a ringing call within your pickup group to your phone.
   
   If you have multiple lines and want to pick up the call on a non-primary line, first press the desired line button, then press **PickUp**.
   
   If your phone supports auto-pickup, you are connected to the call.

2. If the call rings, press the **Answer** softkey to connect to the call.

**Answer a Call Using Group Pickup and a Group Pickup Number**

1. Press the **GPickup** softkey to answer a call on a phone outside your pickup group.
   
   If you have multiple lines and want to pick up the call on another line, first press the desired line button, then press **GPickup**.
2. Enter the group pickup number.
   If your phone supports auto-pickup, you are now connected to the call.
3. If the call rings, press the Answer softkey to connect to the call.

**Answer a Call Using Group Pickup and a Phone Number**

1. Press the GPickup softkey.
   If you have multiple lines and want to pick up the call on a non-primary line, first press the desired line button, then press GPickup.
2. Enter the number of the phone line with the call that you want to pick up. For example, if the call is ringing on line 12345, enter 12345.
   If your phone supports auto-pickup, you are now connected to the call.
3. If the call rings, press the Answer softkey to connect to the call.

**Answer a Call Using Other Pickup**

1. Press the OPickup softkey to transfer a call in your pickup group or in an associated group to your phone.
   If your phone supports auto-pickup, you are now connected to the call.
2. If the call rings, press the Answer softkey to connect to the call.

**Call Waiting**

Call Waiting provides cues to notify you that a new call is ringing on your phone when you are talking on another call, including:
- A call waiting tone (single beep)
- An amber flashing line button

**Respond to a Call Waiting Notification**

(Your system administrator must set up multiple lines on your phone before you can use this feature.)
To answer the ringing call, press the flashing amber line button. Your phone puts the original call on hold automatically and connects the ringing call.
**cBarge**

The cBarge feature allows you to create a standard (ad hoc) conference by adding yourself to a call on a shared line.

**Add Yourself to a Conference on a Shared Line**

Press the line button of the shared line that is in use. If Privacy is enabled, you will not be able to add yourself to the shared line.

**Classic Ring Tones**

The Classic Ring tone feature supports 29 ring tones: 2 embedded in the phone firmware and 27 downloaded from the Cisco Unified Communications Manager. The feature makes the available ring tones common with other Cisco Unified IP Phones.

**Codes**

Codes allow you to place a call using a billing or tracking code. Your phone supports two types of codes (provided by your administrator):

- **Client Matter Codes (CMC)** require you to enter a code to specify that the call relates to a specific client matter. Your administrator can assign client matter codes to customers, students, or other populations for call accounting and billing purposes.
- **Forced Authorization Codes (FAC)** allow you to manage call access and accounting. The Forced Authorization Codes feature requires that the user enter a valid authorization code before the call connects.

**Place a Call Using a Client Matter Code**

1. Dial a number.
2. After the tone, enter a client matter code (CMC).

**Place a Call Using a Forced Authorization Code**

1. Dial a number.
2. After the tone, enter a forced authorization code (FAC).
Conference

Conference allows you to talk simultaneously with multiple parties.

When you are talking on a call, use Conference to dial another party and add them to the call.

If you have multiple phone lines, you can alternately use Conference to combine two calls across two lines. For example, if you have a call on Line 1 and a call on Line 2, you can combine the calls into a conference.

Before completing a conference procedure, you can press the Cancel softkey to cancel the procedure or you can press the Swap softkey to toggle between calls, allowing you to speak privately with each party.

As the conference host, you can remove individual participants from the conference.

The conference ends when all the participants hang up.

Add Another Party to Your Call to Create a Conference

1. Verify that you are on an active call (not on hold).
2. Press the Conference button.
3. Enter the phone number for the party you want to add (or press a speed dial button).
4. Wait for the party to answer (or skip to step 5 while the call is ringing).
5. Press the Conference button again.
   The conference begins.
   Repeat these steps to add more parties, if desired.

Combine Calls Across Lines to Create a Conference

This task requires multiple phone lines.

1. Verify that you have two connected calls and that one of the calls is active (not on hold).
2. Press the Conference button.
3. Press the line button for the other (held) call.
   The conference begins. (The conference is established on the line with the active call.)

Swap Between Calls Before Completing a Conference

After calling a new conference participant, but before adding the participant to the conference, press the Swap softkey to toggle between the two calls. This allows you to consult privately with the party or parties on each call before combining the calls into a conference.
### End a Conference

The conference ends when all participants hang up.

### View Conference Participants

While in a conference, press the Details softkey to view a list of the last 16 participants who have joined the conference.

### Remove Conference Participants

1. While in a conference, press the Details softkey to view a list of participants.
2. Highlight the participant that you want to remove, then press the Remove softkey.

### Divert

Divert allows you to send an active or ringing call to your voicemail system or to a predetermined phone number (set up by your system administrator).

### Divert a Call

Press the Divert softkey to send an active, ringing, or held call to your voicemail system or to a predetermined phone number (set up by your system administrator).

### Do Not Disturb

Do Not Disturb (DND) allows you to turn off either the ringer on your phone, or the ringer and any other audible or visual notification that you have an incoming call.

When the ringer and notifications are turned off, the call is sent directly to your voicemail system.

Your system administrator sets up a line button on your phone for DND, but you can change your DND options from your User Options web pages.

DND interacts with other types of calls:
- If both DND and Call Forward All are enabled, calls are forwarded without any visual or audible confirmation.
- DND does not affect intercom calls or non-intercom priority calls.
- If both DND and auto-answer are enabled, only intercom calls are auto-answered.
**Related Topics**
User Options, page 67

**Turn DND On and Off**

1. Press the DND button to turn on DND.
   Visual confirmation displays briefly.
2. Press the button again to turn off DND.
   Visual confirmation displays briefly.

**Extension Mobility**

Cisco Extension Mobility (EM) allows you to temporarily configure a Cisco Unified IP Phone as your own. After you sign in to EM, the phone adopts your user profile, including your phone lines, features, established services, and web-based settings. Your system administrator sets up EM for you.

**Enable Extension Mobility**

1. Press the Applications button.
2. Select EM Service (name can vary).
3. Enter your user ID and PIN (provided by your system administrator).
4. If prompted, select a device profile.
5. To sign out, press the Applications button.
7. Select EM Service (name can vary).
8. When prompted to sign out, press the Yes softkey.

**Fast Dial**

Fast Dial allows you dial a phone number from the Fast Dial service on your phone. Before you can use Fast Dial on your phone, you must set up Fast Dial on your User Options Web pages.

**Related Topics**
Fast Dials, page 76
Place a Call Using Fast Dial

(Before you can use Fast Dial on your phone, you must set up Fast Dial on your User Options Web pages.)

1. Press the Contacts button.
2. Sign in to Personal Directory.
4. Select a fast-dial code and then press the Dial softkey.

Hold

Hold allows you to put an active call into a held state.

Hold and Resume a Call

1. To put a call on hold, press the Hold button.
   The Hold icon displays and the line button flashes green.
2. To resume the call, press the Resume softkey or the flashing green line button.

Swap Between Held and Active Calls on Multiple Lines

If your phone supports multiple lines, use line buttons to swap between held and active calls. For example, if you have a held call on Line 1 and an active call on Line 2, press the Line 1 button to make the Line 1 call active (resume it from hold) and to automatically put the Line 2 call on hold.

Put a Call on Hold by Answering a New Call on Another Line

If your phone supports multiple lines, and you are already on a call when a new call rings, answering the new call puts the first call on hold automatically. To answer the new call in this case, press the flashing amber line button or the Answer softkey.

Determine if a Shared Line is on Hold

Look for a flashing red line button and the hold icon. When these indicators display, a call on the shared line has been put on hold remotely by the other user.
Hold Reversion

Hold Reversion notifies you when a call is left on hold.

A Hold Reversion notification is similar to a new call notification and includes these cues:

- Single ring, repeating at intervals
- Flashing amber line button
- Flashing message indicator on the handset
- Visual notification on the phone screen

Respond to a Hold Reversion Notification

Press the flashing amber line button or the Answer softkey to resume the call from hold.

Hunt Groups

Hunt groups are used to share the call load in organizations that receive a large number of incoming calls.

Your system administrator sets up a hunt group with a series of directory numbers. When the first directory number in the hunt group is busy, the system hunts for the next available directory number in the group, then directs the call to that phone.

If you are a member of a hunt group, you can sign in to a hunt group when you want to receive calls, and you can sign out of the group when you want to prevent calls from ringing on your phone.

Sign In and Out of a Hunt Group

1. Press the Hunt Group button to sign in.
   Visual confirmation displays briefly.
2. Press the button again to sign out.
   Signing out of a hunt group does not prevent non-hunt group calls from ringing your phone.

Intercom

Intercom allows you to place and receive one-way calls using a dedicated intercom line.

When you place an intercom call, the recipient’s phone auto-answers with mute activated (whisper) and broadcasts your message through the recipient’s speakerphone—or through the headset or handset, if one of these devices is active.
After receiving the intercom call, the recipient can initiate two-way audio (*connected*) to continue the call.

**Place an Intercom Call**

1. Press the **Intercom** button.
   - If your phone auto-dials the intercom code, begin speaking after the alert tone. Otherwise, go to Step 2.
2. Enter the intercom code and begin speaking after the alert tone.

**Receive an Intercom Call**

When you receive an intercom call, you hear an intercom-alert tone and your phone auto-answers the call. Any current call activity that you are engaged in continues simultaneously, but the intercom caller cannot hear you.

To speak to the intercom caller, press the active **Intercom** button.

**Line Status**

Line Status indicators allow you to view the state of a phone line that is associated with a speed dial button.

Your system administrator sets up Line Status indicators on your phone.

**Line Status Indicators**

Line Status indicators show the state of a line.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Phone" /></td>
<td>Line is in use.</td>
</tr>
<tr>
<td><img src="image" alt="Phone" /></td>
<td>Line is idle.</td>
</tr>
<tr>
<td><img src="image" alt="Phone" /></td>
<td>Line is in Do Not Disturb (DND) state.</td>
</tr>
<tr>
<td><img src="image" alt="Phone" /></td>
<td>Line is ringing. (Only for Call Pickup.)</td>
</tr>
</tbody>
</table>
Line Status indicators can be set up on speed dial buttons by your system administrator, and can be used with these features:

- **Speed Dial**—Allows you to monitor the status of (and dial) a specific number on a speed dial button.
- **Call Pickup**—Allows you to monitor the line status of (and pick up a ringing call on) a speed dial button.

Your system administrator can also set up your phone to play an audible alert when a call is ringing on the monitored line.

**Related Topics**

- Speed Dial, page 63
- Call Park, page 43
- Call Pickup, page 45

**Malicious Call Identification**

Malicious Call Identification (MCID) allows you to identify an active call as suspicious, which initiates a series of automated tracking and notification messages.

**Trace a Suspicious Call**

Press the **Malicious Caller ID** button to send a silent notification message to your system administrator. When the silent notification message is sent, your phone provides both a visual and audible confirmation.

**Meet Me**

Meet Me allows you to call a predetermined number at a scheduled time to host or join a conference. The conference begins when the host connects. Participants who call the conference before the host has joined hear a busy tone and must dial again. The conference ends when all participants hang up; the conference does not automatically end when the host disconnects.

**Host a Meet-Me Conference**

1. Obtain a Meet-Me phone number from your system administrator.
2. Distribute the Meet-Me phone number to participants.
3. When you are ready to start the meeting, go off hook to get a dial tone, then press the **Meet Me** softkey.
4. Dial the Meet-Me phone number.

### Join a Meet-Me Conference

Dial the Meet-Me phone number (provided by the conference host).

If you hear a busy tone, the host has not yet joined the conference. In this case, try your call again.

### Mobile Connect

Mobile Connect allows you to use your mobile phone to handle calls associated with your desk phone number.

To set up Mobile Connect, use the User Options web pages to set up remote destinations and create access lists to allow or block calls from specific phone numbers from being passed to the remote destinations.

When you enable Mobile Connect:

- Your desk phone and remote destinations receive calls simultaneously.
- When you answer the call on your desk phone, the remote destinations stop ringing, are disconnected, and display a missed call message.
- When you answer the call on one remote destination, the other remote destinations and desk phone stop ringing, are disconnected, and a missed call message is shown on the other remote destinations.

#### Related Topics

- Create an Access List, page 79
- Add a New Remote Destination, page 78

### Turn On or Off Mobile Connect to All Your Remote Destinations From Your Desk Phone

1. Press the **Mobility** button to display the current remote destination status (Enabled or Disabled).
2. Press the **Select** button to change the status.
3. Press the **Exit** softkey.

#### Related Topics

Add a New Remote Destination, page 78
Switch an In-Progress Call on Your Desk Phone to a Mobile Phone

1. Press the Mobility button.
2. Select Send call to mobile.
3. Answer the in-progress call on your mobile phone.
   The desk phone line button turns red and handset icons and the calling party number appear on the phone display. You cannot use the same phone line for any other calls, but if your desk phone supports multiple lines, you can use another line to make or receive calls.

Switch an In-Progress Call From a Mobile Phone to Your Desk Phone

1. Select a line on your desk phone.
2. Hang up the call on your mobile phone to disconnect the mobile phone, but not the call.
3. Press the Resume softkey on your desk phone within five to 10 seconds and start talking on the desk phone.

Monitor and Record

The Monitoring and Recording feature allows you to monitor and record calls if desired. Your system administrator enables this feature, which can be set up for automatic recording of all calls or recording of calls on a per-call basis.

Users may hear notification tones during call monitoring and recording. By default, the person who monitors the call and records it (if also configured) does not hear the notification tones.

For more information, see your system administrator.

Multilevel Precedence and Preemption

(SCCP only)

In some specialized environments, such as military or government offices, you may need to make and receive urgent or critical calls. If you have the need for this specialized call handling, your system administrator can add Multilevel Precedence and Preemption (MLPP) to your phone.

Keep these terms in mind:

- **Precedence** indicates the priority associated with a call.
- **Preemption** is the process of ending an existing, lower-priority call while accepting a higher-priority call that is sent to your phone.

If you want to choose a priority (precedence) level for an outgoing call, contact your system administrator for a list of corresponding precedence numbers for calls.
If you want to make a priority call, enter the MLPP access number (provided by your system administrator) followed by the phone number.

If you hear a special ring (faster than usual) or special call-waiting tone, you are receiving a priority call. An MLPP icon on your phone screen indicates the priority level of the call.

If you want to view priority level of a call, look for an MLPP icon on your phone screen:

<table>
<thead>
<tr>
<th>MLPP Icon</th>
<th>Priority Level</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Icon 1" /></td>
<td>Highest priority (Flash Override or Executive Override) call</td>
</tr>
<tr>
<td><img src="image" alt="Icon 2" /></td>
<td>High priority (Flash) call</td>
</tr>
<tr>
<td><img src="image" alt="Icon 3" /></td>
<td>Medium priority (Immediate) call</td>
</tr>
<tr>
<td><img src="image" alt="Icon 4" /></td>
<td>Priority call</td>
</tr>
</tbody>
</table>

MLPP icons with white/black background color indicate that the call is selected or not.

Higher-priority calls are displayed at the top of your call list. If you do not see an MLPP icon, the priority level of the call is normal (Routine).

If you want to accept a higher-priority call, answer the call as usual. If necessary, end an active call first.

If you hear a continuous tone interrupting your call, you or the other party are receiving a call that must preempt the current call. Hang up immediately to allow the higher-priority call to ring through.

When you make or receive an MLPP-enabled call, you hear special ringtones and call-waiting tones that differ from the standard tones.

If you enter an invalid MLPP access number, a verbal announcement alerts you to the error.

An MLPP-enabled call retains its priority and preemptive status when you:

- Put the call on hold
- Transfer the call
- Add the call to a three-way conference
- Answer the call using PickUp
Multiple Calls Per Line

Each line can support multiple calls. By default, your phone supports two active calls per line, and a maximum of six active calls per line. Your system administrator can adjust this number (not exceeding six calls) according to your need. Only one call can be connected at any time; other calls are automatically placed on hold.

Answer a Second Call On the Same Line

To answer a second call on the same line, press the flashing amber line button. Any active call is placed on hold, and the second call answers.

The phone screen text changes based on the active call and the number of calls on the line.

Switch Between Multiple Calls On the Same Line

1. Press the line button to switch between two calls on the same line.
2. If there are more than two calls on the line, you can select the call from the call list, and resume the call.

Move From a Line To Another Line With Multiple Calls

1. Press the line button for the call to which you are switching.
2. If a single call is holding on the line, the call automatically resumes. If multiple calls are holding, you are prompted to select the call. Highlight the appropriate call and press Resume softkey.

End a Call On a Line With Multiple Calls

After a call is completed, if there are still multiple calls on the line, the phone screen displays a list of other calls on the line.

Outbound Call Rollover

When a single line reaches maximum calls minus one, the outgoing call automatically rolls over to the next available line. For example, if six maximum calls are configured, the sixth outgoing call automatically rolls over to the next available line.

Create a Conference With Two Calls On the Same Line

1. With two connected calls on the same line, select a call to make it the active call (the second call is put on hold).
2. Press the Conference button.
3. Enter the participant’s phone number.
When the maximum calls are reached on the line, pressing the Conference button allows you to select the call(s) from a list of calls on the line. You can select one of the calls, or press another line button to select a call from the call list to create the conference.

4. Wait for the call to connect.
5. Press the Conference button or the Conference softkey to add the participant to your call. The conference begins.
6. Repeat to add additional participants.
   After calling a new conference participant, but before adding the participant to the conference, you can press the Swap softkey to toggle between the two calls. This allows you to consult privately with the participant on each call before you complete the conference.

Transfer Two Calls On the Same Line

1. Verify that you are on an active call (not on hold).
2. Press the Transfer button.
3. Enter the transfer recipient’s phone number (or press a speed dial button).
   When maximum calls are reached on the line, pressing the Transfer button allows you to select the call(s) from a list of calls on the line. You can select one of the calls, or press another line button to select a call from the call list to transfer the calls.
4. Wait for the recipient to answer. (Or, skip to Step 5 while the call is ringing.).
5. Press the Transfer button again.
   The transfer is complete.
   You can press the Swap softkey to toggle between the two calls. This allows you to consult privately with the participant on each call before you complete the transfer.
Multiple incoming alerting calls

- If there is a second incoming call on the line, while the first call is ringing, the phone screen text changes according to the total number of incoming calls.
- If there are more incoming calls, pressing the Answer key shows all calls on all lines.
- If there is any incoming call on the same line, the call adds to the call list. If you press the line button, you can view the list of calls on the line. Note that line information is not displayed in 6941/6945 phones.
- If there are two simultaneous incoming calls on the phone:
  - Press Answer softkey or line button to answer the call.
  - Press the line button of another line to view the list of incoming calls on that line.

Shared Line

- If there are two or three remote calls on the shared line, the caller ID indicates the number of calls on the line, and the state of the call.
- If at least one call is on hold, on the line, the line button flashes red.
- If all the calls are in use, the line button flashes solid red.

Limitations

The system allows you to configure maximum calls/busy trigger not more than 6/6 both for SCCP and SIP. Any configuration more than 6/6 is not officially supported. For SCCP, you must upgrade to Cisco Unified CM 8.6 or above to support multiple calls per line.

Mute

Mute allows you to block audio input for your handset, headset, and speakerphone, so that you can hear other parties on the call but they cannot hear you.

Mute Your Phone

1. Press the Mute button to turn Mute on.
   Visual confirmation displays.
2. Press the Mute button again to turn Mute off.
On-hook Dialing

On-hook dialing allows you to enter a phone number before getting a dial tone and to complete the call by going off hook.

Dial a Number On Hook

1. Enter or speed dial a phone number.
2. Go off hook.

Plus Dialing

Plus Dialing allows you to press and hold the “*” key for at least 1 second to add a plus “+” sign as the first digit in a phone number for international dialing. It applies both for on-hook or off-hook dialing.

After the + sign has been added to phone numbers, users can go into directories, such as received calls and call history, and select and dial one of these entries with the + sign without having to add digits for international calls.

Dialing an International Number

1. Press and hold the “*” key for at least 1 second. The + sign is entered as the first digit in the phone number. (The corresponding tone stops to indicate that the * has changed to a + sign.)
2. Dial the international number.

Privacy

Privacy allows you to prevent others who share your line from seeing information about your calls. Privacy applies to all shared lines on your phone. If you have multiple shared lines and Privacy is enabled, others cannot view any of your shared lines.

If the phone that shares your line has Privacy enabled, you can make and receive calls using the shared line as usual.

Related Topics
Shared Lines, page 62
Enable Privacy on a Shared Line

1. Press the Privacy button to enable the feature.
   Visual confirmation displays on your phone screen for as long as the feature is enabled.
2. Press the button again to turn off the feature.

Quality Reporting Tool

Your system administrator may temporarily configure your phone with the Quality Reporting Tool (QRT) to troubleshoot performance problems. Depending on configuration, use the QRT to:
- Immediately report an audio problem on a current call.
- Select a general problem from a list of categories and choose reason codes.

Report Problems on Your Phone

1. Press the Quality Reporting Tool button.
2. Select the item that most closely matches your problem. (Use the Navigation pad and Select button to scroll and select.)
3. Press the Select softkey.
   The information is sent to your system administrator.

Redial

Press the Redial button to call the most recently dialed phone number.

Redial a Number

Press the Redial softkey.
To place the call on a particular phone line, get a dial tone on that line, then press the Redial softkey.

Shared Lines

Shared lines allow you to use one phone number for multiple phones.
You might have a shared line if you have multiple phones and want one phone number, share call-handling tasks with co-workers, or handle calls on behalf of a manager.
For example, if you share a line with a co-worker:
• When a call comes in on the shared line:
  – Your phone rings and the line button flashes amber.
  – Your co-worker’s phone rings and the line button flashes amber.
• If you answer the call:
  – Your line button turns green.
  – Your co-worker’s line button turns red.
    When button is red, that line cannot be used to barge in on the call or used to make another call.
• If you put the call on hold:
  – Your line button flashes green
  – Your co-worker’s line button flashes red.
    When the line flashes red, your co-worker can pick up the call.

**Speed Dial**

Speed dial features allow you to press a button and enter a preconfigured code to place a call, or selecting an item from the Call History list. Before you can use speed dial features on your phone, you must set up speed dial on your User Options Web pages.

Depending on setup, your phone can support these speed dial features:
• Speed Dial Buttons—Allow you to quickly dial a phone number from one or more line buttons set up for speed dialing.
• Speed Dial Codes—Allow you to dial a phone number from a code (sometimes referred to as abbreviated dialing).
  
  If your system administrator has set up the Line Status feature, you can monitor the status of a speed dial line by using the line status indicators.

**Related Topics**

• Speed Dial on the Web, page 71
• Line Status Indicators, page 53

**Place a Call with a speed dial Button**

(Before you can use speed dial buttons on your phone, you must set up speed dial on your User Options Web pages.)

To place a call, press a speed dial button 📞. 
Place a Call with a Speed Dial Code

(Before you can use speed dial codes on your phone, you must set up the codes on your User Options Web pages.)

To place a call, enter the speed dial code and press the SpeedDial softkey.

Transfer

Transfer allows you to redirect a connected call from your phone to another number.

You can use Transfer or Direct Transfer:

- Transfer allows you to redirect a single call to another number that you specify.
- Direct Transfer allows you to connect two calls on two different lines to each other (without remaining on the line yourself).

Before completing a transfer procedure, you can press the Cancel softkey to cancel the procedure or you can press the Swap softkey to toggle between calls, allowing you to speak privately with each party.

Transfer a Call to Another Number

1. Verify that you are on an active call (not on hold).
2. Press the Transfer button.
3. Enter the transfer recipient’s phone number (or press a speed dial button).
4. Wait for the recipient to answer. (Or, skip to Step 5 while the call is ringing.)
5. Press the Transfer button again.
   The transfer is complete.

Use Direct Transfer to Connect Calls Across Lines

This task requires multiple phone lines.

1. Verify that you have two connected calls and that one of the calls is active (not on hold).
2. Press the Transfer button.
3. Press the line button for the other (held) call.
   The transfer completes (the two calls are connected to each other).
Swap Between Calls Before Completing a Transfer

After you connect to the transfer recipient—but before you transfer a call to this party—you can press the Swap softkey to toggle between the two calls. This allows you to consult privately with the party on each call before you complete the transfer.

Web Dialer

Web Dialer allows you to click-to-dial contacts from the Cisco Unified CM Directory. Your system administrator sets up this feature for you.

Use Web Dialer with Cisco Directory

1. Sign in to your User Options web pages.
3. Select the number that you want to dial.
4. If this is your first time using Web Dialer, review the preferences on the Make Call page.
5. Select Dial.
   The call is now placed on your phone.
6. To end a call, select Hang up or hang up from your phone.

Use Web Dialer with Another Online Corporate Directory

1. Sign in to a Web Dialer-enabled corporate directory and search for co-workers.
2. Select the number that you want to dial.
3. When prompted, enter your user ID and password.
4. If this is your first time using Web Dialer, review the preferences on the Make Call page.
5. Select Dial.
   The call is now placed on your phone.
6. To end a call, select Hang up or hang up from your phone.

Set Up, View, or Change Web Dialer Preferences

1. Initiate a call using Web Dialer to access the Make Call page.
   The Make Call page displays the first time that you use Web Dialer (after you select the number that you want to dial).
2. Select one of the following options from the Make Call page:
   - Preferred language—Determines the language used for Web Dialer settings and prompts.
   - Use preferred device—Identifies the Cisco Unified IP Phone (Calling device) and directory number (Calling line) that you will use to place Web Dialer calls. If you have one phone with a single line, the appropriate phone and line are automatically selected. Otherwise, choose a phone and/or line. If you have more than one phone of the same type, it will be specified by device type and MAC address. (To display the MAC address on your phone, select the **Applications** button > Phone Information.)
     
If you have an Extension Mobility profile, you can select Extension Mobility from the Calling Device drop-down menu from the Make Call page.
   - Do not display call confirmation—If selected, the Web Dialer Make Call page will not display the next time Web Dialer is used. Calls will automatically be dialed after clicking on a contact from the Cisco Directory.
   - Disable Auto Close—If selected, the call window does not close automatically after fifteen seconds.

**Sign Out of Web Dialer**

Select the sign out icon in the Make Call or Hang Up page.
User Options

User Options Web Pages

Your Cisco Unified IP Phone is a network device that can share information with other network devices in your company, including your personal computer.

You can use your computer to sign in to your Cisco Unified CM User Options web pages, where you can control features, settings, and services for your Cisco Unified IP Phone. For example, you can set up speed dial buttons from your User Options web pages.

After you have signed in to your User Options web pages, select User Options to access the following:

- Device
- User Settings
- Directory
- Personal Address Book
- Fast Dials
- Mobility Settings
- Plugins

Related Topics

- Contacts, page 33
- Call Forward All, page 42

Sign In and Out of User Options Web Pages

Before you can access any of your user options, such as speed dial settings or personal address book, you must sign in. When you are finished using the user options web pages, you must sign out.

1. Obtain the User Options URL, user ID, and default password (provided by your system administrator).
2. Open a web browser on your computer and enter the URL.
3. If prompted to accept security settings, select Yes or Install Certificate.
4. Enter your userid in the Username field.
5. Enter your password in the Password field.
6. Select **Login**.
   The Cisco Unified CM User Options home page displays. From this page you can select User Options to select a device, access User Settings, Directory features, your Personal Address Book, and Fast Dials.

7. To sign out of user options, select **Logout**.

**Device**

You can make changes to your device settings on your phone from the User Options web pages. You can make changes to these device settings on your phone:

- Do not disturb options
- Line settings
- Speed dials
- Phone services

**Related Topics**

Speed Dial, page 63

**Select a Device From the User Options Web Pages**

1. After you have signed in to your User Options web pages, select **User Options > Device**.
   The Device Configuration page displays. Toolbar buttons located at the top of the Device Configuration page are specific to the selected device type.

2. If you have multiple devices assigned to you, select the appropriate device (phone model, Extension Mobility profile, or Remote Destination profile) from the Name drop-down menu.

**Customize Do Not Disturb Options**

1. Sign in to your User Options web pages. Your system administrator sets up the Do Not Disturb (DND) feature for your phone.

2. From the drop-down menu, select **User Options > Device**.

3. Set the following options:
   - Do Not Disturb—Check the check box to enable or disable DND.
   - DND Option—Select either None or Ringer Off (to turn off only the ringer).
   - DND Incoming Call Alert (applies to either DND option set)—Set the alert to Beep Only, Flash Only, Disable, or select “None” (to use the “Alert” setting set up by your system administrator).

Do Not Disturb, page 49

Line Settings

Line settings affect a specific phone line (directory number) on your phone. Line settings can include call forwarding, visual and audio message-waiting indicators, voice-message indicators, ring patterns, and other line-specific settings.

You can set up other line settings directly on your phone:
- Set up call forwarding for your primary phone line
- Change rings, display, and other phone-model specific settings

Related Topics
- Call Forward All, page 42
- Ring Tones, page 31

Set Up Call Forwarding Per Line

1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Line Settings.
5. If you have more than one directory number (line) assigned to your phone, select a line from the Line drop-down menu.
6. In the Incoming Call Forwarding area, select call forwarding settings for various conditions.
7. Select Save.

Call Forward All, page 42

Change the Voice Message Indicator Setting Per Line

1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Line Settings.
5. If you have more than one directory number (line) assigned to your phone, select a line from the Line drop-down menu.
6. In the Message Waiting Lamp area, choose from various settings. Typically, the default message waiting setting prompts your phone to display a steady red light from the handset light strip to indicate a new voice message.
7. Select Save.

**Change the Audible Voice Message Indicator Setting Per Line**

1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Line Settings.
5. If you have more than one directory number (line) assigned to your phone, select a line from the Line drop-down menu.
6. In the Audible Message Waiting Lamp area, choose from various settings.
7. Select Save.

**Change the Ring Settings Per Line**

1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Line Settings.
5. If you have more than one directory number (line) assigned to your phone, select a line from the Line drop-down menu.
6. In the Ring Settings area, set the option for Ring Setting (Phone Idle) and Ring Setting (Phone Active) from the drop-down menus. The options are:
   - Use System Default
   - Disable
   - Flash Only
   - Ring Once
   - Ring
   - Beep Only [this option is only available for Ring Setting (Phone Active)]
7. Select Save.

**Change or Create a Line Text Label for Your Phone Display**

1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Line Settings.
5. If you have more than one directory number (line) assigned to your phone, select a line from the Line drop-down menu.
6. In the Line Text Label area, enter a text label.
7. Select Save.

**Speed Dial on the Web**

Depending on how your phone has been set up, you can use speed dial buttons and speed dial codes, which you can set up on your User Options Web pages.

**Set Up speed dial Buttons**

1. Sign in to your User Options Web pages.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Speed Dials.
5. In the Speed Dial Settings area, enter a number and label for a speed dial button on your phone.
6. Select Save.

**Set Up Speed Dial Codes**

1. Sign in to your User Options Web pages.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Speed Dials.
5. In the Abbreviated Dial Settings area, enter a number and label for a speed dial code.
6. Select Save.

**Phone Services**

Phone services can include special phone features, network data, and web-based information (such as stock quotes and movie listings). You must first subscribe to a phone service before accessing it on your phone. You can subscribe, search, or assign a service to a speed dial button from the User Options web page.

The services available for your phone depend on how the system administrator set up the phone system and which services you are subscribed to. For more information, see your system administrator.
If only one service is set up, the service opens by default. If more than one service is set up, select an option from the menu on the phone display.

Select a service by using one of these feature buttons:

- (a feature button that your system administrator sets up)
- Messages
- Application
- Contacts

**Subscribe to a Service**

1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Phone Services.
5. Select Add New.
6. Select a service from the drop-down list and select Next.
7. Change the service label and/or enter additional service information, if available (optional).
8. Select Save.

**Search for Services**

1. Sign in to your User Options web page.
2. Select a device.
3. Select Phone Services.
4. Select Find.

**Change or End Services**

1. Sign in to your User Options web page.
2. Search for services.
3. Select one or more entries.
4. Select Delete Selected.
Change a Service Name
1. Sign in to your User Options web page.
2. Search for services.
3. Select a service name.
4. Change the information and select Save.

Add a Service to an Available Programmable Feature Button
1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Service URL. Your system administrator sets up a service URL button for your phone.
5. Select a service from the Button Service drop-down list.
6. If you want to rename the service, edit the label fields.
7. Select Save.
8. Select Reset to reset your phone (necessary to see the new button label on your phone).

User Settings
Your PIN and password allow you to access different features and services. For example, use your PIN to sign in to Cisco Extension Mobility or Personal Directory on your phone. Use your password to sign in to your User Options web pages and Cisco Web Dialer on your personal computer. For more information, see your system administrator.

User settings include your browser password, PIN, and language (locale) settings.

Change Your Browser Password
1. Sign in to your User Options web pages.
2. Select User Options > User Settings.
3. Enter your Current Password.
4. Enter your New Password.
5. Reenter your new password in the Confirm Password field.
6. Select Save.
Change Your PIN

1. Sign in to your User Options web pages.
2. Select User Options > User Settings.
3. Enter your Current PIN.
4. Enter your New PIN.
5. Reenter your new PIN in the Confirm PIN field.
6. Select Save.

Change the Language for Your User Options Web Pages

1. Sign in to your User Options web page.
2. Select User Options > User Settings.
3. In the User Locale area, select an item from the Locale drop-down list.
4. Select Save.

Change the Language for Your Phone Display

1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select an item from the User Locale drop-down list.
4. Select Save.

Directory

To get a list of co-workers in your corporate directory, select User Options > Directory.
The Directory features that you can access on your computer consist of:

- Personal Address Book (PAB), which can also be accessed from your phone
- Fast Dials, which can also be accessed from your phone
- Cisco Unified Communications Manager Address Book Synchronizer

Related Topics

- Personal Directory, page 34
- Corporate Directory, page 33
Personal Address Book

You can add, delete, or update personal address book entries from the User Options web page.

Add a New PAB Entry

1. Sign in to your User Options web page.
2. Select User Options > Personal Address Book.
3. Select Add New.
4. Enter information for the entry.
5. Select Save.

Search for a PAB Entry

1. Sign in to your User Options web page.
2. Select User Options > Personal Address Book.
3. Specify search information and select Find.

Edit a PAB Entry

1. Sign in to your User Options web page.
2. Search for a PAB entry.
3. Select a nickname.
4. Edit the entry as needed and select Save.

Delete a PAB Entry

1. Sign in to your User Options web page.
2. Search for a PAB entry.
3. Select one or more entries.
4. Click Delete Selected.
Assign a Feature Button for Personal Address Book

1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select a phone from the Name drop-down menu.
4. Select Service URL.
   Your system administrator sets up your phone to display services. For more information, see your system administrator.
5. Select the Personal Address Book service from the Button drop-down list box.
6. Enter a phone label for the button.
7. Select Save.
8. Select Reset and then select Restart to refresh the phone configuration.

You can now press the button to access PAB codes.

Fast Dials

You can add, delete, or update fast dial entries from the User Options web page.
You can create up to 500 Fast Dial and PAB entries. You can create a new Fast Dial entry without using a PAB entry. Such Fast Dial entries are labeled “raw” in the User Options web pages and do not display a configurable text label.

Assign a Feature Button for Fast Dial

1. Sign in to your User Options web page.
2. Select User Options > Device.
3. Select Service URL (provided by your system administrator).
4. Select the Fast Dial service from the Button drop-down list box.
5. Enter a phone label for the button.
6. Select Save.
7. Select Reset and then select Restart to refresh the phone configuration.

Assign a Fast Dial Code to a PAB Entry

1. Sign in to your User Options web page.
2. Select User Options > Fast Dials.
3. Select Add New.
4. Use the Search Options area to find the appropriate PAB entry.
5. Select a phone number in the Search Results area.
6. Change the Fast Dial code, if desired.
7. Select Save.

### Assign a Fast Dial Code to a Phone Number Without Using a PAB Entry

1. Sign in to your User Options web page.
2. Select User Options > Fast Dials.
3. Select Add New.
4. Change the Fast Dial code, if desired.
5. Enter a phone number.
6. Select Save.

### Search for a Fast Dial Entry

1. Sign in to your User Options web page.
2. Select User Options > Fast Dials.
3. Specify search information and select Find.

### Edit a Fast Dial Phone Number

1. Sign in to your User Options web page.
2. Select User Options > Fast Dials.
3. Search for the Fast Dial entry that you want to edit.
4. Select a component of the entry.
5. Change the phone number.
6. Select Save.

### Delete a PAB Entry

1. Sign in to your User Options web page.
2. Search for a Fast dial entry.
3. Select one or more entries.
4. Select Delete Selected.

**Mobility Settings**

When using Cisco Mobile Connect, you must add your mobile and other phones that you want to use to make and receive calls using the same directory numbers as your desk phone. These phones are called *remote destinations*. You can also define access lists to restrict or allow calls from certain numbers to be sent to your mobile phone.

**Related Topics**

Mobile Connect, page 55

**Add a New Remote Destination**

1. Sign in to your User Options web page.
2. Select User Options > Mobility Settings > Remote Destinations.
3. Select Add New.
4. Enter the following information:
   - Name—Enter a name for the mobile (or other) phone.
   - Destination Number—Enter your mobile phone number.
5. Select your remote destination profile from the drop-down list box. Your remote destination profile contains the settings that apply to remote destinations that you create.
6. Select the Mobile Phone check box to allow your remote destination to accept a call sent from your desk phone.
7. Select the Enable Mobile Connect check box to allow your remote destination to ring simultaneously with your desk phone.
8. Select one of the following options in the Ring Schedule area (the ring schedule drop-down list boxes include only the access lists that you have created):
   - All the time—Select this option if you do not want to impose day and time restrictions on ringing the remote destination.
   - As specified below—Select this option and select from the following items to set up a ring schedule based on day and time:
     a. Select a check box for each day of the week you want to allow calls to ring the remote destination.
     b. For each day, select All Day or select the beginning and ending times from the drop-down lists.
     c. Select the time zone from the drop-down list box.
9. Select one of these ringing options:
   - Always ring this destination.
   - Ring this destination only if the caller is in the allowed access list that you select.
   - Do not ring this destination if the caller is in the blocked access list that you select.

10. Select Save.

**Create an Access List**

1. Sign in to your User Options web page.
2. Select User Options > Mobility Settings > Access Lists.
3. Select Add New.
4. Enter a name to identify the access list and a description (optional).
5. Select whether the access list will allow or block specified calls.
6. Select Save.
7. Select Add Member to add phone numbers or filters to the list.
8. Select an option from the Filter Mask drop-down list box. You can filter a directory number, calls with restricted caller ID (Not Available), or calls with anonymous caller ID (Private).
9. If you select a directory number from the Filter Mask drop-down list box, enter a phone number or filter in the DN Mask field. You can use the following wild cards to define a filter:
   - X (upper or lower case)—Matches a single digit. For example, 408555123X matches any number between 4085551230 and 4085551239.
   - !—Matches any number of digits. For example, 408! matches any number starts with 408.
   - #—Used as a single digit for exact match.
10. To add this member to the access list, select Save.
11. To save the access list, select Save.

**Plugins**

Plugins on your User Options web pages allow you to download and access applications that your system administrator sets up for you.

For more information, see your system administrator.
Access Plugins

1. Sign in to your User Options web page.

2. Select User Options > Plugins.
   
   You can view plugins only if your system administrator has set them up for you.
FAQs and Troubleshooting

Frequently Asked Questions

Q. Why don’t I see the icons shown in the documentation on my phone screen?
A. Many of the phone screen icons are applicable only to the Cisco Unified IP Phone 6941.

Q. Can I use the second line on my Cisco Unified IP Phone 6921 as a feature button?
A. Yes. If you do not require two phone lines, your system administrator can set up a feature on your second line.

Q. When I put a call on hold by pushing the Hold button, why doesn’t pushing the button again resume the call?
A. The Hold button is used only to put a call on hold. To resume a call, press the Resume softkey or the flashing green line button.

Q. Why does my phone not work (“wake up”), when it worked before?
A. If your system administrator has set up your phone for EnergyWise, the phone may be sleeping (powered down). Your system administrator sets your phone to sleep at a certain time and wake (power up) at a certain time. Your phone will wake up at the time set by your system administrator. You can press the Select button to wake your phone up. See your system administrator to have the sleep and wake up times changed.

Q. My phone played the ringtone four times in succession, but there is no call. What does this mean?
A. The phone is notifying you that your phone will power down (sleep) soon to conserve energy (the EnergyWise feature). Your system administrator sets your phone to sleep at a certain time and wake (power up) at a certain time. Your phone will wake up at the time set by your system administrator. See your system administrator to have the sleep and wake up times changed.

Q. What do I do if my phone displays the message “Security Error”?
A. Your phone firmware has identified an internal error. Try unplugging the phone from the power source, wait one minute, and then plug the phone back in. If the message persists, contact your system administrator.

Troubleshooting Tips

Troubleshooting tips are available for these topics:

- Conference
• Personal Directory
• Shared Lines
• User Options

Conference

Problem: Conference Button and Softkey Unresponsive
You have set up a conference call, and the Conf softkey is no longer available and the Conference button is unresponsive.

Possible Cause
You have reached the maximum number of conference participants.

Solution
Ask one of the participants to drop, or drop a conference participant.

Problem: Meet-Me Conference Busy Tone
You hear a busy tone after dialing into a Meet-Me conference.

Possible Cause
The conference host has not yet joined the conference.

Solution
Try calling back again.

Personal Directory

Problem: Cannot Sign In to Personal Directory
You are unable to sign in to your personal directory.

Make sure you are using your personal identification number (PIN) to sign in, and not your password.

Possible Cause
Your PIN needs to be reset.

Solution
See your system administrator.
Shared Lines

Problem: No Caller ID on Remote Hold
You have a shared line on your Cisco Unified IP Phone 6921, and cannot see the caller ID when the remote line is on hold.
Possible Cause
This works as designed.
Solution
None.

User Options

Problem: Cannot Access User Options Web Pages
You are unable to access your user options web pages.
Possible Cause
Your password needs to be reset.
Solution
See your system administrator.

Cleaning the Cisco Unified IP Phone
To clean your Cisco Unified IP Phone, use only a dry soft cloth to gently wipe the phone and the phone screen. Do not apply liquids or powders directly on the phone. As with all non-weather-proof electronics, liquids and powders can damage the components and cause failures.
When the phone is in sleep mode, the touchscreen is blank and the Select button is not lit. When the phone is in this condition, you can clean the screen, as long as you know that the phone will remain asleep until after you finish cleaning. If the phone is likely to wake up during cleaning, wake it up or wait until it is awake before following the preceding cleaning instructions.
Product Safety, Security, Accessibility, and Related Information

Safety and Performance Information

Power outages and other devices can affect your Cisco Unified IP Phone.

Power Outage

Your accessibility to emergency service through the phone is dependent on the phone being powered. If there is an interruption in the power supply, Service and Emergency Calling Service dialing will not function until power is restored. In the case of a power failure or disruption, you may need to reset or reconfigure equipment before using the Service or Emergency Calling Service dialing.

External Devices

Cisco recommends using good quality external devices (such as headsets) that are shielded against unwanted radio frequency (RF) and audio frequency (AF) signals.

Depending on the quality of these devices and their proximity to other devices such as mobile phones or two-way radios, some audio noise may still occur. In these cases, Cisco recommends that you take one or more of the following actions:

- Move the external device away from the source of the RF or AF signals.
- Route the external device cables away from the source of the RF or AF signals.
- Use shielded cables for the external device, or use cables with a better shield and connector.
- Shorten the length of the external device cable.
- Apply ferrites or other such devices on the cables for the external device.

Cisco cannot guarantee the performance of the system because Cisco has no control over the quality of external devices, cables, and connectors. The system will perform adequately when suitable devices are attached using good quality cables and connectors.

⚠️ Caution ⚠️

In European Union countries, use only external speakers, microphones, and headsets that are fully compliant with the EMC Directive [89/336/EC].
Cisco Product Security

This product contains cryptographic features and is subject to United States and local country laws governing import, export, transfer and use. Delivery of Cisco cryptographic products does not imply third-party authority to import, export, distribute or use encryption. Importers, exporters, distributors and users are responsible for compliance with U.S. and local country laws. By using this product you agree to comply with applicable laws and regulations. If you are unable to comply with U.S. and local laws, return this product immediately.

Further information regarding U.S. export regulations may be found at:
http://www.access.gpo.gov/bis/ear/ear_data.html.

Accessibility Features

The Cisco Unified IP Phones 6921, 6941, and 6961 provide accessibility features for the vision impaired, the blind, and the hearing and mobility impaired.

For detailed information about the accessibility features on these phones, see Accessibility Features for the Cisco Unified IP Phones 6921, 6941, and 6961.

You can also find more information about accessibility at this Cisco website:
http://www.cisco.com/web/about/responsibility/accessibility/index.html
