CONDUCTATIONAL ENROLMENT

When you apply to enrol in a doctoral programme at the University of Waikato, your application should be supported by an initial research proposal. The research proposal forms the basis of the research project and the subsequent work leading up to the preparation of the thesis. During your first six months of conditional enrolment you will be required to develop this initial proposal into a full research proposal which will be considered with your application for confirmed enrolment.

PREPARING AN INITIAL RESEARCH PROPOSAL

At this point, it is necessary to use broad terms to describe the intended area of research. Nevertheless, it is desirable that the aims and methods of the research be clearly worked out between supervisor and candidate before work commences.

A number of departments have particular requirements relating to the format of research proposals, so you are advised to check with the relevant department before preparing your proposal.

Initial research proposals submitted to the Postgraduate Studies Committee for conditional enrolment consideration should contain the following:

1. A working title for the thesis.
2. A clear and concise outline of the topic or research question, and the proposed aims or objectives of the study.
3. A brief description of the research methodology and, if appropriate, the theoretical framework.
4. An indication of the theoretical and research traditions which inform the project.
5. A timetable outlining the proposed stages of work, through to completion.
6. An indication of the resources required (e.g. library, computing, laboratory equipment).
7. An ethics statement which declares if your research project requires ethical approval. Ethical approval is required for all research involving human subjects (including medical and/or teaching related research), animals or genetically modified organisms (http://www.waikato.ac.nz/sasd/postgraduate/ethics.shtml).

Examples of an ethics statement:

“This research involves the participation of human and/or animal subjects. An application for ethics approval will be submitted to the Faculty Ethics Committee during the period of conditional enrolment”

“This research does NOT involve the participation of human and/or animal subjects. Therefore there is no requirement to submit an application for ethics approval to the Faculty Ethics Committee during the period of conditional enrolment”
