National Atlas of Canada

The Fifth Edition of the National Atlas of Canada consisted of 93 separate, stand-alone maps that were published between 1978 and 1995. The maps covered a wide range of subjects, but there was a slight emphasis on environmental issues. Although the map sheets varied considerably in their overall size, the format of nearly all the maps consisted of a central map at scale 1: 7 500 000, accompanied by a legend, a source list and extensive notes.

Some of the maps are available online at

5th ed. Various dates. Scale 1: 7,500,000 unless stated. Only those maps held by the University of Waikato Library are listed here.
