

Blurb – Background of Scholarship:

Applications are invited for a PhD scholarship opportunity to study leaf hydraulic design and transpiration in Te Aka Mātuatua - School of Science, University of Waikato. This research is part of a Marsden-funded project on leaf water stable isotopes and their influence on the stable oxygen isotope composition of atmospheric oxygen. The successful applicant should be eligible to enrol at the University of Waikato. Prior experience in leaf gas exchange measurement and stable isotope techniques would be advantageous.

Eligibility criteria:

Level: Postgraduate

Full-time

Domestic/International

Application documents required:

- CV, including statement of previous research experience
- Two academic references
