**EXPECTED OUTCOMES:**

1. Review of international practice regarding shooting at moving vehicles
2. Review of recent literature for any changes to best practice
3. Review of changes in technology and related risk
4. Recommendations for changes to policy and training

**STUDENT TASKS:**

1. Review of current international policy and practice
2. International best practice literature review
3. Review of relevant technology
4. Development of recommendations
5. Report writing
6. Preparation of other dissemination materials

**REQUIRED SKILLS:**

1. Ability to identify relevant research literature
2. Ability to write clearly and coherently for target audiences (e.g., stakeholders)
3. Ability to critically analyse research findings (including statistical analyses) and provide insight
4. Ability to communicate orally with stakeholders
5. Ability to work independently but also use supervision effectively, and take feedback
This project will examine relevant literature and other evidence to determine how research and evidence can inform best practice. The research will be focused around the following 4 research questions:

1. What are the current policies of Police internationally regarding shooting at moving vehicles?
2. Have there been any recommended changes in best practice noted in the literature?
3. What are the risks of shooting at moving vehicles? Have changes in technology (e.g. firearms/ballistics) altered the risks involved in shooting at moving vehicles?
4. Are there any changes to current training that may be required based on current evidence and best practice?

If you have particular queries about this project, please contact Devon Polashek directly, devon.polashek@waikato.ac.nz
