Background of Scholarship:
We have a fully funded (fees and living stipend) one year MSc(Research) position based in the department of Computer Science. This is part of an MBIE funded project looking at the use of personal monitoring technology in hazardous work environments. The research will involve setting up, running and analysing user studies with forestry workers. The studies will aim to determine appropriate types of data to gather, the best technologies to use, and suitable methods for providing feedback to workers. This research will suit students with a background in HCI and an interest in IoT. Mature students are particularly encouraged to apply.

Eligibility criteria:
Postgraduate
Full-time
Domestic/PR students

Application documents required:
• CV
• A short statement (2-3 paragraphs) describing your background and interests and how this aligns with the position described
• 2 academic references

Contact and email address for applications:
Dr Judy Bowen
jbowen@waikato.ac.nz

Closing date:
December 20th, 2019 or earlier if suitable candidate is selected
