

University of Waikato Library: Map Collection

Australia: Geological maps 1: 250,000

The Map Collection of the University of Waikato Library contains a comprehensive collection of maps from around the world with detailed coverage of New Zealand and the Pacific.

Editions are first unless stated. These maps are held in storage on Level 1. Please ask a librarian if you would like to use one.

Coverage of Australian States – only Western Australia (WA), Queensland (Q) and Northern Territory (NT) are held.

The numbering of the maps represents a grid system. The first two letters, eg SD represent north-south with the second letter increasing away from the Equator. The next numbers, eg 56 represent east-west and increase from west to east. Please see Australia topographical maps for index maps.

SC 52

Melville Island	(NT)	SC-52-16
